

Sage Line 500 version 7

Sage Line 500 v7 is now available. This new version was developed through close consultation with customers and contains enhancements across a number of areas. Here's just a selection - you can find out more in a top-level guide to What's New in v7:

Credit Management Module

This module is significantly enhanced - it now has improved enquiries, support for group working, and better management of statement/order point customer relationships.

Back to Back Ordering

Sage Line 500 already has this flexibility - v7 takes it a step further. In particular there's much more flexibility about how sales orders are fulfilled. For example you can now have mix of fulfilment methods including from stock or back to back, even on the same sales order line.

Customer Returns Module

This module speeds up the process of customer returns and allows tighter control over the quantity of goods being returned.

Universal Client

The Universal Client allows you to access Sage Line 500 via a Web browser. With v7 there is enhanced capabilities in the Universal Client to bring it even closer to the functionality on offer in the desktop version.
